Welcome! Enjoy a Virtual Tour of Our Campus
Entrance

Students are greeted each morning by members of our faculty and staff.

In our front lobby, our two office coordinators will welcome you to campus and answer your questions.

To help keep our Red-Tailed Hawks safe, we also have two security guards on campus, and our Early Learning students have a separate, walk-in entrance.
Our campus is home to students from age 2–grade 12.

When visiting the First Floor, you will see our Early Learning Program and students in grades 1-3. They spend the majority of their day on the First Floor.

The First Floor also houses the Theater, Music Program, and The Great Hall, which serves as our community-gathering space.
The Great Hall

Celebrations like Open House (our kick-off to the school year), Lunar New Year, Hawks Care (service projects), and more often take place in The Great Hall.

Early Bird (Before Care) and Late Bird (After Care) for students in grades 1-8 take place here daily.

If you visit during lunch time, you will see many students eating here. Students can eat a school lunch or bring it from home.
Theater and Music

The Hawk Lounge (a reception area leading into our theater) and our Theater and Music rooms are highlights of any tour and are used throughout the year for:

• Drama and Music Classes
• Community Celebration and Award Ceremonies
• Performances and Presentations
• Movie Nights, Faculty vs. Student Quiz Bowl, and more!

Perhaps you can join us for our next production!
Early Learning

Early Learning families park in our parking garage and walk students into school.

They are greeted by one of our team members before accessing the Early Learning Atrium. Here you will likely run into our Early Learning Dean and Director.

Starting at 7:00AM, toddlers go into one of our toddler classrooms and all other Early Learning students enjoy playing at a station in our Atrium or outside on a nice day.
Early Learning Classrooms

Our Early Learning Program begins with Toddlers and includes PreK-1 (three year olds), PreK-2 (four year olds), and Kindergarten.

During a visit to campus, you get to see our dynamic two-teacher model in action. Each Early Learning classroom has one teacher focused on language and literacy and one teacher focused on math and science.

Plus, students see Specials teachers for STEM, Mandarin, Music, and more!
Early Learning Playground

Our Early Learning students love getting outdoors and exploring the world around them.

We have a special playground area for Early Learning with equipment for students ages 2-5.

We also have a track for tricycles, push cars, and scooters. There are a lot of fun outside toys depending on the season.

Here you will hear shouts of joy and laughter. The slides are always a big hit!
Primary Program

Beginning in Grade 1, our Primary students move from class to class with their Learning Expert Teacher (LET) to see Subject Expert Teachers (SETs) for each subject area.

You will often see a group of our students in READ, a daily, 20-minute READ period, or participating in our social and emotional learning program.

Plus, you will see our Primary students learning Mandarin daily.
Second Floor

Students in grades 4-8 spend the majority of their day on the Second Floor; however, our high school students visit the Second Floor for Chemistry, some foreign languages, and some electives.

On the Second Floor, you will also see our gym, Engineering Lab, middle school Dean’s Office, and some hangout spaces.

Auxiliary Programs, which hosts after-school clubs and activities, is also housed here.
The Gym

Our Red-Tailed Hawks enjoy taking PE, which takes place in the gym beginning in Kindergarten. After Grade 6, students can continue to take PE as an elective throughout high school.

Our gym is also used for basketball practice for our Middle School, JV, and Variety teams, as well as, for karate and volleyball.

Students can also start their day shooting hoops in the gym if they arrive on campus early.
Beginning in Kindergarten, students move from taking STEM to an Engineering class. In middle and high school, Engineering is a daily elective.

When you visit our Engineering Lab, you will see students working on hands-on, multi-week projects where they practice problem-solving and critical-thinking skills.

From building bridges to rockets, you will see laughter, smiles, and ideas in motion!
On the Third Floor, you will see the hub of daily life for students in grades 9-12. In addition to housing many of our high school classes, it also includes our College Counseling Office, Reading Room (a special study space for high school students), breakout rooms, and the high school Director and Dean.

Beginning in PreK, all students visit the Third Floor Art Studios, and middle school students will study biology, physics, and more here.
High School Spaces

In addition to the Reading Room, high school students also have the High School Lounge and other breakout areas.

While the Reading Room is often used for studying, conducting research projects, or working on the college application process, the High School Lounge is a place to relax and unwind.

It is great to see our Red-Tailed Hawks have fun, learn, and grow as they prepare for success in college and beyond.
Our liberal arts curriculum with a STEM focus makes the BASIS Curriculum unique.

Whether a student is in grade 5 Introduction to Science, or a grade 12 Science Capstone class such as Topics in Modern Physics or Biology of Cancer, these labs are always exciting to observe!

On campus, you will see our teachers, at each grade level, focus on making learning engaging, interactive, and fun!
The Art Studios

Our campus features two art studios, one for our PreK-grade 4 and one for grades 5 and above.

Here we start with the basics and help students learn to express themselves and explore their creativity. Our Art Program is offered through high school and culminates with AP Studio Art.

Student creations line our hallways throughout the year and are the centerpieces of most of our community gatherings, as well as our annual Art Show.
Outside

As you arrive on or leave campus, you will see our main outside area, which includes a grassy area, basketball and four square courts, picnic tables, and our Primary playground.

This outside space is available to students during lunch and after school. We often take many of our community gatherings outside, and we even see some teachers moving classes outside on a nice day.
Our Campus

We can’t wait to be back on campus and to welcome you for a visit.

In the meantime, we hope this virtual tour has given you a glimpse of our 11-acre campus and our dynamic community.

On behalf of CARL, our Red-Tailed Hawk mascot, and all of our community, we look forward to seeing you soon!
Thank you for joining us on this virtual campus tour!
